Get to know your TAC representatives!

Jennifer: I have lived at The Landings for 11 years. I decided to join the TAC team because CHT was willing to include ideas of the residents' mission and vision to work towards the Landings community's shared goals and objectives. CHT ensured that the TAC team would be structured to establish relationships with the Landings residents to solve problems and support and nourish the community and residents through meaningful communication exchanges.

John: I've lived at the Landings since my building opened. I opted to be active on the TAC project because I have some experience with nonprofits. Without improved communications, I felt we were subject to blind decision making which naturally seems arbitrary. The TAC is an effort to open communications. We now have an opportunity to do better.

Annie: I joined TAC team because of what they were trying to do in the community. They help build relationships with tenants and their community as well management.

Tanya: I have lived in The Landings for 11 years. I like living here because it is a safe, beautiful, quiet, and comfortable home at a great value. I have decided to join the TAC team because I want to serve my community. My hope is that the TAC team will benefit our community by serving as a means by which we can address the needs of the residents of our community - - putting residents first.

Brieann: I have lived at the Landings for 10 years. I joined the TAC team to help with input as to what and how improvements would make our community a better place to live. Helping to improve better communication is important to making better decisions by Community Home Trust and management companies. The TAC team is an important bridge between residents, management and Community Home Trust. I'm proud to be a small part of making our community a better place to live.
